

NimbusShop Help Center FAQ

Common customer questions about orders, refunds, billing, account access, app troubleshooting, and privacy.

Category	Use when the customer asks about
Billing	Invoices, duplicate charges, failed payments, payment method updates, tax receipts
Technical	Login issues, app crashes, sync problems, order tracking bugs, checkout errors
Refunds	Return eligibility, subscription cancellation, refund timeline, non-refundable items
Shipping	Delivery times, tracking updates, missing packages, damaged packages
Account	Profile updates, password reset, email address changes, account privacy

1. Refund And Return Policy

What is the standard refund window?

Physical product orders are eligible for a refund within 30 calendar days of delivery if the item is unused, undamaged, and returned with the original packaging. Refunds are issued to the original payment method.

How long does a refund take?

After the returned item is received and inspected, NimbusShop approves or rejects the refund within 3 business days. Approved refunds usually appear on the customer's statement within 5 to 10 business days, depending on the bank.

Which items are not refundable?

Gift cards, final-sale products, downloadable digital goods, and items damaged after delivery are not refundable unless local consumer law requires otherwise.

How do subscription cancellations work?

A customer may cancel a NimbusPlus subscription at any time. Cancellation stops the next renewal. NimbusShop does not refund the unused portion of the current billing month unless the customer was charged twice or the service was unavailable for more than 24 consecutive hours.

2. Billing FAQ

The customer says they were charged twice.

Ask for the order number, last four digits of the payment card, charge dates, and charge amounts. If two settled charges exist for one order, refund the duplicate charge in full. Pending authorizations are not settled charges and normally drop off within 3 to 7 business days.

The customer wants an invoice or receipt.

Invoices and receipts are available from Account > Orders > View receipt. If the customer cannot access the account, verify the order email address and send the receipt to that same email only.

The customer's payment failed.

Suggest checking card expiration, billing address, bank restrictions, and available funds. Do not ask the customer to send full card numbers, passwords, or one-time passcodes.

3. Account And App FAQ

The customer cannot log in.

Customers should reset their password, confirm they are using the correct account email address, update the app, and try a private browser window. If the problem continues, they should contact support with their device, browser, app version, and the error message shown.

The app crashes or freezes.

Customers should update the app, restart the device, clear cache, and retry on a stable network. If the crash continues, they should share the device model, OS version, app version, and the exact action that caused the crash.

Order tracking does not update.

Tracking can take up to 24 hours to refresh after a carrier scan. If tracking has not changed for 72 hours, create a carrier investigation ticket and tell the customer they will receive an update within 2 business days.

4. Shipping FAQ

How long does delivery take?

Standard delivery usually takes 3 to 6 business days after the order ships. Express delivery usually takes 1 to 2 business days after shipment. Delivery times may vary during public holidays, severe weather, or carrier delays.

What should customers do if a package is missing?

Customers should first check the tracking page, delivery photo, mailbox, reception desk, and nearby safe places. If the package is still missing 24 hours after the carrier marks it delivered, customers should contact support with the order number.

What if an item arrives damaged?

Customers should contact support within 7 calendar days of delivery and include the order number, a photo of the damaged item, a photo of the shipping box, and a short description of the issue.

5. Privacy And Security FAQ

What information should customers never send?

Customers should never send full payment card numbers, passwords, security codes, or one-time passcodes through email or chat. NimbusShop support will only ask for safe verification details such as order number, account email address, and the last four digits of a payment card.

What should customers do if they suspect unauthorized account access?

Customers should reset their password immediately, sign out of all active sessions from Account > Security, and contact support if they notice unknown orders, changed profile details, or unfamiliar payment methods.

How can customers request deletion of their account?

Customers can request account deletion from Account > Privacy > Delete account. Deletion requests are reviewed within 10 business days. Some order, payment, and tax records may be retained where required by law.
